

Infos for freshmen in uni

You're new to the Uni of Potsdam, don't know how things work around here and want to meet new people?

We, the Fachschaftsrat (FSR), your student representation have organized a number of things in order to make your start into university life as easy and enjoyable as possible.

In the **Erstiwochen (04.10. - 23.10.21)** you'll find all kinds of events planned by yours truly. The given date is the last week before the start of the lecture period. In this week we offer you an easy-going get-to-know-everything program to help make your entry into uni as comfortable as possible. Due to Corona we still face a few restrictions, but there will be in-person events besides a number of online events so that you'll be able to meet your fellow students. You'll find all the important information in your **Ersti-Heft**, which you'll receive at the introductory events and can also download in the following Info-Box any time.

Furthermore, it's there that you will find the **presentation of the introductory event**.

In case you already have questions regarding your start of studies, write uns an e-mail: fsrmaphy@lists.astaup.de or simply join our [Discord-Server](#).

- Files regarding the Ersti-Woche:
 - [Erstiheft 2021](#)
 - [Insert Erstiheft - Dates](#)
 - [Presentation of the introductory event FSR](#)
 - [Presentation Frau Magdans \(Lehramt Physik\)](#)
 - [Presentation Introductory Meeting FSR \(English/Astrophysics\)](#)

Our plan of events

Spread across the introductory weeks we're got a number of events planned out in order for you to meet your fellow students, acquire tools of assistance for your studies and your FSR planned out. In the first week, where the introductory events will take place, this is limited to an „Online Office Hour“ over Zoom, which you can show up to anytime to ask away. The other two weeks, where the maths - bridge course will be taking place, are largely about you getting to know each other. For that we've planned (Online-) meet-and-greets and tabletop evenings. We'll also be grilling, taking you on a pub tour, as well as a bicycle tour. We look forward to meeting you all!

Information regarding the bridge course you'll find [here](#)

Events with the notice „online“ you'll find on our **Discord Server [MaPhy Discordserver](#)**. For a few events we'll also be using **Zoom**. You'll get the invitation link to the zoom-events on our discord server too as well as on one of our **Telegram channels**.

The maths café is in the maths building (house 9) in room K0.05

Ersti-Tour

This year the Ersti-Tour takes place on the 29th to 31st of October. Sign in for the tour via the following link: <https://forms.gle/puDmqCXXexjtYYGd6> (You'll find all other intel there too. For questions write an email to Anmeldung@fsr.physik.uni-potsdam.de)

We'll notify you on the 18th of October about who'll be able to join the tour

Introductory events

You'll find additional information on the [official homepage of the University of Potsdam](#).

Maths Bridge Course

(for freshmen in the maths and physics major)

In order to freshen up your maths-skills we recommend taking the maths bridge course. Time period: 11.10.2021 to 22.10.2021 (on workdays). During the first week this will take place between 8-16 o'clock, during the second week between 10-16 Uhr o'clock.

[All infos on the bridge course here.](#)

You will find a public preparation course on the [page of the university of Lüneburg for example.](#)

For all the physicists among you the second week will be organized by the institute of physics (Prof. Feldmeier and Prof. Wilkens). In this week Lisa Rüther lruether@uni-potsdam.de and Rick Simon

rick.paul.axel.simon@gmail.com will lead the tutorials. Feel free to contact them if you have any questions. **During the first few semesters there will be additional bridge courses in maths and experimental physics.** These in-semester tutorials will also be organized by Lisa Rüther and Rick Simon. They will approach you in the first week of lectures to find fitting dates for the tutorials.

The current Course Directory and PULS

You'll find the current Course Directory [here](#).

Since the PDFS there can be a bit long and confusing, we recommend the directory on **PULS (The University of Potsdam's portal for teaching and study organization)**. On PULS you can and must, as soon as you have a uni-account, sign up for all the courses and exam credits that you want to be credited for.

All your performances at our university will be saved in PULS.

Although you can put together your own study plan, we recommend keeping to the course plan noted in the study regulations for at least the first semester.

If you feel unsure or want to change something though, ask us during one of the many introductory events or [just write us an e-mail](#).

Keep an eye on the deadlines, so that you'll be signed up for the courses and exams **on time**. You cannot sign up for a course post-deadline, PULS is sadly very strict in that regard. You'll find all the deadlines [here!](#)

PULS can give you your timetable as a pdf, which you can then print out.

Furthermore you'll find important documents there besides the course directory, like the **certificate of study and other performance overviews**.

Study and exam regulations

The current study and exam regulations for maths and physics can be found on the homepage of the related institute. The exam regulations include the rights and duties you have as a student of your major. It's important to make yourself familiar with the contents of your regulations, you should check it out at least once in the duration of your studies.

Here you can view them online too:

[All study regulations of the University of Potsdam](#)

We've linked the newest study regulations that you'll start with here:

Superordinate study regulations

[Mono-Bachelor- and Mono-Master regulation](#)
[Teaching-Bachelor- and Teaching-Master regulation](#)

These regulations are superordinate to all major-specific study regulations and therefore apply to all students of our university.

It's always the study regulation valid for your point of matriculation that applies to you. Changing to an older regulation is impossible.

major-specific study regulations

Physics:

[Mono-Bachelor regulation](#)
[Mono-Master regulation \(and older Bachelor regulation\)](#)

[Teaching-Bachelor- and Teaching-Master regulations \(Sek I and II\)](#)

Mathematics:

[Mono-Bachelor](#)
[Mono-Master regulation](#)

[LA-Bachelor- und LA-Master regulation \(Sek I and II\)](#)
